Planet OpenStack

April 2nd, 2020 - OpenStack Nova also known as OpenStack pute is massively scalable and provides self service style access to pute resources like virtual machines containers and bare metal services Asides from being absolutely fundamental to your OpenStack cloud Nova creates the puting resources of your cloud'

'Discover OpenStack The Storage ponents Swift and Cinder

April 28th, 2020 - To get an idea of how you might use OpenStack storage imagine a scenario in which you have a service that runs legacy software using a file system and new code where you want to use distributed object storage The environment for this project should include both Swift and Cinder'

'Uncategorized Archives OpenStack Blog for VMware

February 1st, 2020 - OpenStack is also a perfect plement to K8S by providing underline services that are outside the scope of K8S Kubernetes deployments in most cases can leverage the same OpenStack ponents to simplify the deployment or developer experiences 1 Multi tenancy Create K8S cluster separation leveraging OpenStack Projects'

'Containers Rise to the Challenges of Hybrid IT

April 29th, 2020 - 451 Research believes application containers to be the primary use case in the enterprise for popular container software This OpenStack container synergy centers on the speed and efficiency gained by development teams This is especially true in OpenStack private cloud environments which assist in scaling out the use of containers'

'Solum OpenStack

April 21st, 2020 - OpenStack Native Design Leverage existing OpenStack projects Heat Nova Glance Keystone Neutron Trove etc Advanced features such as an optional multi tenant SDN from Neutron with OVS to allow an application to securely share a private network with other services such as caches queues data services etc"

Briefing Mirantis Enables OpenStack on Kubernetes CloudDon
October 17th, 2019 - In a typical OpenStack deployment OpenStack services such as pute Storage Networking Identity etc are installed on bare metal servers OpenStack software also supports installing these services on virtual machines or containers Mirantis OpenStack already supports deployment of OpenStack services on containers'

'OpenStack Mirantis

April 28th, 2020 - Mirantis Cloud Platform MCP uses DriveTrain to give you the flexibility to capture and continuously tune the OpenStack services versions configuration and topology of your clouds to suit the changing needs of your business ? all while delivering critical updates with minimal interruption'

'VMware Integrated OpenStack Datasheet

April 29th, 2020 - traditional applications or build new applications based on containers VMware Integrated OpenStack offers a production ready Kubernetes support with multi tenancy and persistent storage volumes This provides out of the box solution for customers who want to run containers on OpenStack and leverage VMware?s virtualization technologies"Network Functions Virtualization Planning and

April 23rd, 2020 - This guide contains important planning information and describes the configuration procedures for single root input output virtualization SR IOV and dataplane development kit DPDK for network functions virtualization infrastructure NFVi in your Red Hat OpenStack Platform deployment'

'Nspawn OpenStack with OpenStack Ansible

April 10th, 2020 - The OpenStack Ansible project has been around for a few years now but if you re unfamiliar with it the TL DR is it s an OpenStack deployment project running OpenStack services within containers and uses Ansible The original project came from the Rackspace Private Cloud and when it was started it set out to containerize workloads without jumping on the fail whale tail like everyone else at'

'AWS Fargate and OpenStack Zun paring the Serverless

November 20th, 2019 - It is integrated and released together with other OpenStack services Virtual Private Cloud VPC CloudWatch and many others At OpenStack Zun containers are To leverage the"Kuryr OpenStack

April 24th, 2020 - Neutron is an OpenStack project to provide networking as a service Kuryr leverage Neutron abstraction in order to create virtual networks for containers and containers orchestration engines

Magnum Magnum is an OpenStack project to deploy contains both at Virtual Machine or Physics Machine'

'Better together OpenStack and Kubernetes

April 26th, 2020 - Better together OpenStack and Kubernetes Open Infrastructure for Cloud Native Frameworks OpenStack is posable open infrastructure that provides API driven access to pute storage and networking resources The ?exible platform allows you to deploy bare metal virtual machines and container resources?all on a single network"
