May 10th, 2018 - Gradient descent is a first order iterative optimization algorithm for finding the minimum of a function To find a local minimum of a function using gradient descent one takes steps proportional to the negative of the gradient or approximate gradient of the function at the current point'

'A review on optimization of composite structures Part I

May 7th, 2018 - Composite sandwich and functionally graded materials are frequently utilized for different applications Thus numerous optimization studies have been conducted on structures made up of these materials to improve their mechanical or thermal behavior such as

buckling resistance stiffness and strength along with reducing weight cost and stress"**MPFR C Holoborodko**

May 10th, 2018 - In order to use MPFR C ? just include mpreal h to you code and use mpreal numbers as usual floating point numbers of double or float types See example in distribution for more information'
