holder springer" a new high T_c for Pb superconductors

May 29th, 2020 - the best Pb superconductors have a unit cell of around 16 metal layers and at least some planar weight disparity. Pwd the first high temperature Pb copper oxide superconductor discovered was $Pb_2Sr_2CaYCu_3O_8$ by Cava et al. 1. This 70K material has 16 metal layers and pwd between the Y and Ca layers. See far right graphic below." superconductor history

June 1st, 2020 - the first of these theoretical superconductors was

successfully synthesized in 1980 by danish researcher klaus bechgaard of the university of copenhagen and 3 french team members tmtsf 2 pf 6 had to be cooled to an incredibly cold 1 2k transition temperature known as tc and subjected to high pressure to superconduct but its mere'
