of**

May 24th, 2020 - imagery
rescripting of traumatic or
distressing stories from childhood
accepted by the therapist therefore
all feelings must be validated the
therapist must show that he or she
trusts and understands the patient
and wants to find a mon way of how
to process the past events so that
they do not interfere with the
patient s life any longer''**imagery
rescripting for ptsd and
personality disorders**

April 19th, 2020 - imagery
rescripting is a psychotherapy
technique that has been integrated
into cognitive behaviour therapy
cbt interventions in the treatment
of various psychiatric populations
including post traumatic stress
disorder ptsd personality disorders
specific phobias depression
obsessive pulsive disorder social
phobia and suicide risk'
