June 3rd, 2020 - the
wordpress handbook
now lists the
remended php modules
wordpress core makes
use of php extensions
if the preferred
extension is missing
wordpress will either
have to do more work
to do the task the
module helps with or
in the worst case
will remove
functionality
therefore the php

social plugins
documentation
facebook for
June 4th, 2020 -
facebook for

wordpress plugin the
facebook for
wordpress was an
officially supported
tool to help
wordpress developers
integrate social
plugins and publish
open graph stories
the plugin is no
longer officially
supported by facebook
but is maintained by
the developer munity'
'what is php how is
php used in wordpress
June 5th, 2020 - php
is an open source
server side scripting
and programming
language that s
primarily used for
web development the

bulk of the core
wordpress software is
written in php which
makes php a very
important language
for the wordpress
community some like to
state that php as a
programming language
is dead but that s
not true there are
different versions of
php that you can
install on your'
