### **Building RESTful Web APIs with Django lynda**

**May 4th, 2020 - The Django REST framework is the natural choice for Python and Django developers who want to create their own RESTful back end APIs In addition to its rapid prototyping tools the framework includes authentication schemes serialization for parsing plex data into Python friendly types and automatic URL routing"***Java versus Python Data Science Central*

*April 29th, 2020 - Java and Python have a lot of libraries It again depends on what you are doing Python has some great but evolving visualization libraries Java has some great but expensive ones Python is easier to learn and use if the documentation exists Bokeh for example is great but the documentation lags development'*

### **'Stripe API Reference**

**May 2nd, 2020 - The Stripe API is anized around REST Our API has predictable resource oriented URLs accepts form encoded request bodies returns JSON encoded responses and uses standard HTTP response codes authentication and verbs You can use the Stripe API in test mode which does not affect your live data or interact with the banking networks"**Python API Tutorial Getting Started with APIs

---

## Dataquest

**May 4th, 2020 - In this Python API tutorial we'll learn how to retrieve data for data science projects There are millions of APIs online which provide access to data Websites like Reddit Twitter and Facebook all offer certain data through their APIs To use an API you make a request to a remote web server and retrieve the data you need'**

### 'emoji 0 5 4 PyPI The Python Package Index

**May 4th, 2020 - Files for emoji version 0 5 4 Filename size File type Python version Upload date Hashes Filename size emoji 0 5 4 tar gz 43 4 kB File type Source Python version None Upload date Sep 12 2019 Hashes View'**

### 'csv CSV File Reading and Writing Python 3 8 3rc1

**May 4th, 2020 - csv writer csvfile dialect excel fmtparams ¶¶ Return a writer object responsible for converting the user's data into delimited strings on the given file like object csvfile can be any object with a write method If csvfile is a file object it should be opened with newline 1 An optional dialect parameter can be given which is used to define a set of parameters specific to a'**

### 'API Standards

*May 4th, 2020 - API was formed in 1919 as a standards setting organization and is the global leader in convening subject matter experts across segments to establish maintain and distribute consensus standards for the oil and gas industry In its first 100 years API has developed more than 700 standards to enhance operational safety environmental protection'*

### 'Geo location APIs Google Maps Platform Google Cloud

*May 4th, 2020 - ? Google Maps Platform was almost a foregone conclusion due to its familiarity reliability accuracy flexibility ongoing innovation and relationships with other data providers It met all our requirements and*

---

*provided virtually limitless integration capabilities'*

### **'Building A Logistic Regression in Python Step by Step**

**May 4th, 2020 - Logistic Regression is a Machine Learning classification algorithm that is used to predict the probability of a categorical dependent variable In logistic regression the dependent variable is a binary variable that contains data coded as 1 yes success etc or 0 no failure etc In other words the logistic regression model predicts P Y 1 as a ?'**

### **'APIs BrightTALK**

**April 2nd, 2020 - APIs Discover the latest collection of talks and videos on APIs from industry experts With the arrival of the IoT the API economy is on the rise With so many platforms connecting it?s imperative that APIs are easily integrated and secure but all APIs have different standards for stability reliability and quality'**

### **'Quickstart Create a search index in Python using REST**

*May 3rd, 2020 - 2 Load documents To push documents use an HTTP POST request to your index s URL endpoint The REST API is Add Update or Delete Documents Documents originate from HotelsData on GitHub In a new cell provide four documents that conform to the index schema"***GitHub betagouv leximpact client Simuler l impact des**

*February 18th, 2020 - leximpact server application en python utilisant OpenFisca France permettant de mettre en place une API Web répondant à des questions sur l impact de modifications de la loi fiscale Ici même leximpact client interface web muniquant avec l API qui met à disposition des usagers un site web permettant de définir des modifications de la loi et d en visulaliser les résultats calculés'*

### **'Query your Google Search analytics data Search Console API**

**May 2nd, 2020 - Run search analytics api sample py specifying the URI of a Search Console property that you have read access to a start date and an end date Example python search analytics api sample py s**

---

**example 2015 05 01 2015 05 30 You will be asked to grant OAuth access to your Search Console data to the sample in order to run it'**
