**'Benchmarking Random Forest Implementations Data Science**

*May 10th, 2018 - Hi Szilard I think it is fair to say that if you are capable of fitting all your data within one machine with a decent amount of RAM as in your case then do not expect scalable processing tools such as Spark and Hadoop to give you the most efficient solution'*

**'Genetic Algorithms and Evolutionary Computation**

*May 8th, 2018 - The first and most important point is that genetic algorithms are intrinsically parallel Most other algorithms are serial and can only explore the solution space to a problem in one direction at a time and if the solution they discover turns out to be suboptimal there is nothing to do but abandon all work previously completed and start over'*
