'Understanding Design Of Oil

Tanker Ships Marine Insight

September 30th, 2017 - The

design of an oil tanker is a

weight based design which

means the dimensions of an oil

tanker would be governed by

the weight of cargo to be

carried The other type of

design is volume based design

where the dimensions of the

ship are determined by the

volume of cargo spaces

required in the vessel'

'Ship construction Britannica

com

October 11th, 2018 - Ship construction complex of activities concerned with the design and fabrication of all marine vehicles A naval architect asked to design a ship may receive his instructions in a form ranging from such simple requirements as ?an oil tanker to carry 100 000 tons deadweight at 15 knots? to a"Construction amp Fabrication **TEC Engineering**
