*management of neurogenic dysphagia postgraduate medical*

*June 4th, 2020 - acute stroke is complicated by dysphagia in about 25-42% of all cases. 1. dysphagia in these patients is usually associated with hemiplegia due to lesions of the brain stem or the involvement of one or both hemispheres however on rare occasions dysphagia may be the sole manifestation of a cerebrovascular event'*

**'pharyngeal electrical stimulation evaluation for dysphagia**

**June 2nd, 2020 - pharyngeal electrical stimulation evaluation for dysphagia after stroke proved the safety and scientific validity of this study is the responsibility of the study sponsor and investigators listing a study does not mean it has been evaluated by the u s federal government'**

**'the relationship between lesion localization and dysphagia**

---

**April 22nd, 2020 - factors that can facilitate early identification of individuals at risk of dysphagia such as stroke location are potentially of great benefit the aim of this study was to examine the role of hemisphere and lesion location in assessing dysphagia pattern and airway invasion as identified through the use of validated standardized interpretation measures for the videofluoroscopic swallowing study'**

**'clinical assessment of swallowing and prediction of**

**June 2nd, 2020 - dysphagia with aspiration is prevalent in acute stroke however noninvasive clinical screening assessments to identify patients at risk of developing aspiration are limited this study was undertaken to determine whether risk factors detected in the clinical examination approximated the videofluoroscopic swallow study vss in identification'**

***'dysphagia after stroke an overview springerlink***

*April 14th, 2020 - dysphagia affects more than 50 of stroke survivors fortunately the majority of these patients recover swallowing function within 7 days and only 11 13 remain dysphagic after 6 months 3 4 one study reported that 80 of patients with prolonged dysphagia required alternative means of enteral feeding the most feared complication of dysphagia after stroke is aspiration pneumonia"***pdf dysphagia following stroke researchgate**

**May 13th, 2020 - dysphagia is mon after stroke we aimed to study the prognosis of dysphagia assessed clinically over the first 3 months after acute stroke and to determine whether specific neurovascular"***dysphagia following stroke*

*October 20th, 2019 - multivariate analysis revealed that stroke mortality and disability were independently associated with dysphagia p lt 0 0001 conclusions the frequency of dysphagia was relatively high regarding anatomical clinical correlation the most important factor was the size rather than the location of the lesion'*

**'difficulty swallowing after stroke dysphagia american**

**June 5th, 2020 - difficulty swallowing after stroke dysphagia your stroke may cause a swallowing disorder called dysphagia if not identified and**

---

**managed it can lead to poor nutrition pneumonia and disability" dysphagia following stroke third edition clinical**

May 23rd, 2020 - dysphagia following stroke third edition is a practical and easy to use resource for clinicians treating swallowing disorders in the stroke population the authors bridge the gap between academic and clinical practice with up to date research and clinical case examples throughout"pdf  
**dysphagia after stroke incidence diagnosis and**

May 23rd, 2020 - the reported incidence of dysphagia was lowest using cursory screening techniques 37 to 45 higher using clinical testing 51 to 55 and highest using instrumental testing 64 to 78 dysphagia tends to be lower after hemispheric stroke and remains prominent in the rehabilitation brain stem stroke'

**'defining and measuring dysphagia following stroke**

**June 5th, 2020 - the use of a single measure or single liquid volumes to classify dysphagia did not distinguish between healthy adults and individuals following stroke with and without dysphagia abnormality on more than 1 measure across multiple volumes appears to be a more robust method in defining dysphagia for liquids'**

**'post stroke dysphagia amp risk management swallow study**

June 6th, 2020 - dysphagia is mon post stroke dysphagia may be one of the most life threatening plications after a stroke which could lead to adverse events such as pneumonia malnutrition dehydration and mortality rokus pulia amp robbins 2013'

**'psychometric assessment and validation of the dysphagia**

**June 3rd, 2020 - post stroke dysphagia psd is mon affecting upwards of 40 of patients in the hours to days after ictus and is associated with poor oute manifest as increased death or dependency"**
