## Digital Image Processing

A digital image processing is applied to digital images a matrix of small pixels and elements For manipulating the images there is a number of software and algorithms that are

---

---

*applied to perform  
changes Digital image  
processing is one of the  
fastest growing industry  
which affects everyone s  
life'*

## Topics

April 30th, 2020 -

Digital image processing mainly includes image collection image processing and image analysis At its most basic level a digital image processing system

---

---

is prised of three  
ponents ie a puter system  
on which to process  
images an image digitizer  
and an image display  
device'

Books

April 30th, 2020 - A  
prehensive digital image  
processing book that  
reflects new trends in  
this field such as

---

---

document image compression  
and data compression  
standards The book  
includes a complete rewrite  
of image data compression a  
new chapter on image  
analysis and a new  
section on image  
morphology'

Course

April 26th, 2020 -

Digital image processing  
deals with processing of  
images which are digital  
in nature Study of the  
subject is motivated by

---

---

three major applications  
The first application is  
in improvement of  
pictorial information for  
human perception i e  
enhancing the quality of  
the image so that the  
image will have a better  
look'

technological aspects of  
Digital Image Processing  
with special reference to  
satellite image  
processing'*

**'Erosion and Dilation in  
Digital Image Processing**

---

---

## Buzztech

April 30th, 2020 - It deals with extracting image ponents that are useful in representation and description of shape It includes basic morphological operations like erosion and dilation

---

---

The outputs of  
morphological processing  
generally are image  
attributes Erosion and  
dilation are fundamental  
morphological operations  
But before understanding  
these let us'

---

---

## **Tutorialspoint**

April 19th, 2018 -

Digital image processing deals with manipulation of digital images through a digital puter It is a subfield of signals and systems but focus particularly on images

---

---

DIP focuses on developing a computer system that is able to perform processing on an image. The input of that system is a digital'
