aspects in architecture
are being more and more
important' 'eco

**architecture hisour hi
so you are**

**May 21st, 2020 - eco
architecture or
sustainable architecture
is architecture that
seeks to minimize the
negative environmental
impact of buildings by
efficiency and
moderation in the use of**

materials energy and
development space and
the ecosystem at large
the lighting situation
in a building is posed
of both natural daylight
and artificial
light ' 'eco architecture
v wit press

May 29th, 2020 - eco
architecture by
definition is a highly
multi disciplinary
subject eco architecture
v harmonisation between
architecture and nature
will therefore be of
interest to in addition
to architects many other
professionals including
engineers planners
physical scientists
sociologists and
economists '

**'vegitecture project
brings vertical farming
to paris**

May 27th, 2020 - feb 18
2020 vegitecture project
brings vertical farming

to paris suburb a
vertical garden is a
wonder of space flower
decoration and climate
aid in one modern city
gardeners know about the
diversity of this garden
variant but it also
enjoys great popularity
in the natural or even
rural garden similar to
a planted cabinet or a
wall they create an
unobtrusive green
natural flair'
