research hematology
May 31st, 2020 - in this article we
provide an overview of statistical

methods relevant to 2 major types of oncology research observational studies and clinical trials in observational studies the primary factor of interest is the explanatory or independent variable cannot be manipulated instead these studies are used to assess potential associations'' increased risk of leukemia among sickle cell disease

June 2nd, 2020 - due to improvements in treatment and care the life expectancy of patients with sickle cell disease scd has improved over the last 50 years 1 such that many patients now survive to an age where they are at an increased risk for cancer 2 previously reported small case series 3 6 or surveys 7 have suggested an increased cancer risk in patients with scd'

'methods and tools for population based cancer statistics

June 2nd, 2020 - methods and tools developed for the statistical analysis and reporting of spatial and temporal patterns of cancer geographic information systems gis portal a web based station

*for interactive mapping and visualization
of cancer related geo spatial data'*
