April 29th, 2020 -  
JadRetro for Linux is a  
mand line utility that  
could help You to  
successfully depile Java  
classes created by the  
modern Java pilers of  
Java 1.4 Java 1.5 or later  
JadRetro operates by  
transforming the  
specified Java class files  
if needed into ones  
which could be  
processed correctly by  
an old Java depiler  
designed to work with  
classes of Java 1.3 or  
earlier"ANN

**LeBer reBeLog**

**March 8th, 2020 -**

**Getting started with  
D2W is not an easy  
task and I owe a  
massive debt to the two  
chapters in the Wrox  
book Professional  
WebObjects 5.0 with  
Java which is sadly out  
of print The book was  
a team effort but I  
believe that Jim  
Roepcke wrote those  
two chapters and is**
