a menace in your home

May 16th, 2020 - The sick building syndrome has been such a big problem in the United States in recent years. It's a phrase you can now find in the dictionary. It is defined as an illness characterized by skin irritations, headache, and respiratory problems that is caused by indoor pollutants, inadequate ventilation, and microorganisms which include mold. The sick building syndrome prevalence studies

January 20th, 2017 - there were highly significant excesses of these six symptoms in the air conditioned buildings when pared by

chi 2 tests with the naturally ventilated buildings it is suggested that these six symptoms represent the sick building syndrome and that the size of the problem is probably greater than is currently recognised'

'sick building syndrome is it the buildings or the people
