Identification par coprologie des helminthes de python

May 2nd, 2020 - L'étude de la charge helminthique du Python regius a été réalisée de décembre 2007 à juin 2008 dans 4 fermes d'élevage de reptiles installées dans les villes de Bohicon et d'Abomey Les examens coprologiques ont été réalisés sur 45 pythons Au total 10 espèces de nématodes et 1 espèce de cestode ont été identifiées Un oeuf de nématode est resté non identifié'

'The effects of UV light on calcium metabolism in ball

March 23rd, 2020 - The ball python Python regius is one of the most mon boid species kept in captivity and so far no research has been performed on the effects of UV radiation on this species Boid snakes have followed a different evolutionary path to colubrid snakes and retain more primitive characteristics Vitt and Caldwell 2009 so it is unknown if they would be able to respond to UV b light in the"Python regius LFT Shop
