The effects of UV light on calcium metabolism in ball

March 23rd, 2020 - The ball python *Python regius* is one of the most mon boid species kept in captivity and so far no research has been performed on the effects of UV radiation on this species Boid snakes have followed a different evolutionary path to colubrid snakes and retain more primitive characteristics Vitt and Caldwell 2009 so it is unknown if they would be able to respond to UV b light in the'
