Ball python
May 4th, 2020 - The ball python Python regius also called the royal python is a python species native to West and Central Africa where it lives in grasslands and

shrublands It is listed as Least Concern on the IUCN Red List because of its wide distribution It is threatened by hunting for its meat and for the international pet trade This nonvenomous constrictor is the smallest of the African pythons'

*DESCRIPTION Royal
Pythons are a relatively
small thick bodied
species of python
featuring a slender neck
and well differentiated
head'* **Royal Python
Woburn Safari Park
April 29th, 2020 - The
name Royal Python is
believed to be derived
from the fact that many
African rulers were
known to have worn live
pythons as jewellery
Snakes usually only
have one thin lung
However pythons have
two lungs one of which
is considerably smaller
than the other They also
have remnants of hind
legs and pelvic bones'**

'Ball Pythons Reptiles Reptiles New Morphs

April 29th, 2020 - The

Ball Python Python

Regius or the Royal

Python is species of

nonvenomous snakes

that belongs to the

Family Pythonidae

Python Regius is native

to Africa and is the

*smallest of Africa s
Python species Due to
the small size and the
temperament the snake
is possibly the most
popular snake in the pet
trade'*

**'Royal Python Python

March 27th, 2020 -
Royal Python ?Python
regius The Royal
Python or sometimes
known as the Ball
Python is as the name
suggests a member of
the Python species Its
ease of care and
generally placid
temperament has
made it one of the
most popular and
monly kept pet snakes'**

**'Python regius CITES
April 29th, 2020 - CITES
is an international
agreement between
governments aimed to
ensure that international
trade in specimens of
wild animals and plants
does not threaten their
survival" **SURVEY OF
THE STATUS AND
MANAGEMENT OF
THE ROYAL PYTHON**
April 30th, 2020 -
Between 1991 and 1997
Ghana developed a
ranching programme for
the royal python Python**

regius Initially the operations entailed keeping male and female Python regius in captivity at the average ratio of 1 male to 3 or 4 females The pythons were put together in November for mating in December"
