'History of sound recording

May 6th, 2020 - In 1857 Édouard Léon Scott de Martinville invented the phonautograph the first device that could record sound waves as they passed through the air It was intended only for visual study of the recording and could not play back the sound The recording medium was a sheet of soot coated paper wrapped around a rotating cylinder carried on a'

'Evolution of the eye

May 6th, 2020 - The rate

of eye evolution is difficult to estimate because the fossil record particularly of the lower Cambrian is poor How fast a circular patch of photoreceptor cells can evolve into a fully functional vertebrate eye has been estimated based on rates of mutation relative advantage to the animal and natural selection'
