design of supertall

what is the major  
problem faced with  
structural design  
and

May 23rd, 2020 -  
agree with mr robert  
along with that one  
of the biggest  
problems in  
construction of a  
skyscraper is  
planning to  
construct a small  
house you need a  
progress schedule to  
build a skyscraper  
you need a critical  
path schedule  
usually a tall  
buildi'

introduction  
skyscrapers are very  
tall buildings with  
many floors  
skyscrapers have  
been a fascination  
for people for  
engineers it is a  
challenge to build  
structure that rises  
hundreds of feet  
above the ground the  
great pyramid of  
giza built at 2560  
bc stood at 146 5  
meters and'
