### **MPFR C Holoborodko**

May 10th, 2018 - In order to use MPFR C ? just include mpreal h to you code and use mpreal numbers as usual floating point numbers of double or float types See example in distribution for more information"**Sorting algorithms Quicksort Rosetta Code**

**May 8th, 2018 - Task Sort an array or list elements using the quicksort algorithm The elements must have a strict weak order and the index of the array can be of any discrete type"***Merge Sort 2018 Bogotobogo*

*May 11th, 2018 - Although heapsort has the same time bounds as merge sort it requires only  $O(1)$  auxiliary space instead of merge sort's  $O(n)$  and is often faster in practical implementations'*
