October 11th, 2018 - Logarithm the exponent or power to which a base must be raised to yield a given number Expressed mathematically x is the logarithm of n to the base b if  $b^x = n$  in which case one writes  $x = \log_b n$  For example  $2^3 = 8$  therefore 3 is the logarithm of 8 to base 2 or  $3 = \log_2 8$  In the same fashion since  $10^2 = 100$  then  $2 = \log_{10} 100$  Logarithms of the latter sort that is logarithms"4 Clear and Easy Ways to Use Logarithmic Tables wikiHow
