April 28th, 2020 - Genetic programming often uses tree based internal data structures to represent the puter programs for adaptation instead of the list structures typical of genetic algorithms Grouping genetic algorithm GGA is an evolution of the GA where the focus is shifted from individual items like in classical GAs to groups or subset of items 55" **An enhanced algorithm for multiple sequence alignment of**

February 6th, 2017 - In this paper an alignment method using genetic algorithm for multiple sequence alignment has been proposed Two different genetic operators mainly crossover and mutation were defined and implemented with the proposed method in order to know the population evolution and quality of the sequence aligned
