**April 8th, 2020 - Why a re introduction
Because JavaScript is notorious for**

being the world's most misunderstood programming language. It is often derided as being a toy, but beneath its layer of deceptive simplicity, powerful language features await. JavaScript is now used by an incredible number of high-profile applications, showing that deeper knowledge of this technology is an important skill for any web.'

'An Introduction to JavaScript

May 3rd, 2020 - JavaScript on a webpage may not read/write arbitrary files on the hard disk, copy them, or execute programs. It has no direct access to OS functions. Modern browsers allow it to work with files, but the access is limited and only provided if the user does certain actions, like dropping a file into a browser window or selecting it via an `input type="file"` tag.'
