Removal Hydroxide  
precipitation is  
the standard  
method of removing  
heavy metals from  
wastewater This is  
achieved by  
adjusting the pH  
of the wastewater  
with an alkaline  
reagent to reduce  
the solubility of  
the dissolved  
metals and  
settling and  
removing the  
resultant metal  
hydroxide  
precipitates'
