April 8th, 2020 - boolean function plexity advances and frontiers stasys jukna 2012 vol 27 sparsity graphs structures and algorithms jaroslav ne?et?il and patrice ossona de mendez 2012 vol 28 optimal interconnection trees in the plane marcus brazil and martin zachariasen 2015 vol 29''graph based algorithms for boolean function manipulation May 27th, 2020 - graph based algorithms for boolean function manipulation12 randal e bryant3 abstract in this paper we present a new data structure for representing boolean functions and an associated set of manipulation algorithms

functions are represented by directed acyclic graphs in a manner similar to the 'tardos function

January 8th, 2020 - approximating the lovász number of the complement and then rounding the approximation to an integer would not necessarily produce a monotone function however to make the result monotone tardos approximates the lovász number of the complement to within an additive error of 'boolean
