'execnotificationqueryasync callback in
jscript

September 20th, 2018 - i fot to mention
that the script is embedded in an html
page not a standalone text file so i m
not using wsh wscript createobject
method but activexobject object of
jscript my problem is how to connect the
callback function to the sink object
ronald'

*'call subroutine asynchronously vbscript
tek tips*

*June 3rd, 2020 - re call subroutine
asynchronously strongm mis 9 nov 17 09*

10 suffice it to say that running my code as an unprivileged user from the scheduler works exactly as i d expect always remembering that unless running as the logged in user the task cannot interact with the desktop which i think you already know i e'

'how to program with vbscript 3 steps with pictures

June 4th, 2020 - how to program with vbscript vbscript is a windows native programming language that is mainly used to create web server applications vbscript is embedded within an html file and is fairly straightforward note that vbscript differs from'

'calling methods asynchronously
testplete documentation
June 3rd, 2020 - calling methods
asynchronously 2020 when executing a
script the script engine goes through
the script code line by line the
execution of the next statement or
method call is only possible after the
execution of the previous statement or
method is pleted that is if you call a
method in your script code the script
execution will'

'vbscript to read xml assistance needed
videohelp forum

June 2nd, 2020 - i need some help
parsing a xml file with a script i would

like to get just the description data and put it into plot variable i got it working somewhat but i cannot pull of just the description it grabs the whole showlist i tried using description as my node but it doesn t work see script and xml sample below script dim objxml root x'

'snmp get via ms technet script not working

May 19th, 2018 - i m working on a project that requires polling numerous devices throughout our anization with snmp to determine various configuration health etc parameters routers switches etc i ve found a script on technet which

leads me to believe that i should be able to script this with vbscript wsh but it just doesn t seem to'

'connecting to wmi with vbscript win32 apps microsoft docs

June 4th, 2020 - connecting to wmi with vbscript 05 31 2018 3 minutes to read in this article wmi scripts can condense many of the steps required in a c program they can connect to wmi not only through an swbemlocator object but also through the moniker winmgmts a moniker is a short name that locates a namespace class or instance in wmi'

'using vbscript with wsh windows script host

May 10th, 2020 - using vbscript with wsh

windows script host this section provides tutorial example on how to run a simple vbscript code file with the windows script host tool windows script host wsh is a windows administration tool that provides host environments for several scripting languages including vbscript'

'making an asynchronous call with vbscript win32 apps

June 3rd, 2020 - the following procedure describes how to make an asynchronous call by using vbscript to make an asynchronous call using vbscript connect to wmi and get an swbemservices object set service getobject winmgmts create

*the object sink using either
createobject or for windows script host
2 0 only the object tag with an events
attribute set to true'*

**'call exe from vbscript wait for return
and catch return**

June 1st, 2020 - the problem with your
attached vbscript cusas76 is that in
line 2 you set shellmand to c someapp
exe and then in line 9 you use a wmi
query filtered by the process name and

try to match it to shellmand the process name of c someapp exe is going to be someapp exe so your wmi query will never match anything and will always give you a colprocesses count of 0'
