May 9th, 2018 - The impulse response of this ideal low pass filter is shown below it is a sinc function The equation is shown next to the plot If we could create a filter with this impulse response we would have an ideal low pass filter like that shown above" ***Why is it that in a Bode plot realization we consider open***

*May 9th, 2018 - In Nyquist plot frequency is a parameter and it is difficult to determine the frequency of a point on a Nyquist plot In Bode plot magnitude in db and phase are plotted against frequency and that problem does not arise"* **Links to Online Software David M Boore Homepage**
