'Java ActionListener javatpoint

May 4th, 2020 - The Java ActionListener is notified whenever you click on the button or menu item It is notified against ActionEvent The ActionListener interface is found in java.awt.event package It has only one method actionPerformed The actionPerformed method is invoked automatically whenever you click on the registered ponent'

'Methods Thoughts on RESTful API Design

May 3rd, 2020 - Each action resource that is POSTed should have a ?type? attribute that indicates the type of action to be performed and can have arbitrary other attributes that parameterize the operation It should be noted that actions should only be used as an exception when there?s a good reason that an operation cannot be mapped to one of the standard RESTful methods'
