CDF Statistics mittee

April 10th, 2020 - The charge of the Statistics mittee is to identify typical problems in statistical analysis of CDF data and to propose solutions which conform to sound statistical procedures Examples of such problems are setting limits fitting to theoretical predictions and merging of results from different analyses experiments'

'Convolution

May 6th, 2020 - In mathematics in particular functional analysis convolution is a mathematical operation on two functions f and g that produces a third function expressing how the shape of one is modified by the other The term convolution refers to both the result function and to the process of putting it It is defined as the integral of the product of the two functions after one is reversed and shifted'
