Human identification at a distance via gait recognition

November 19th, 2019 - 2 Traditional approaches for gait based human identification ?History and databases  
?Gait representation and learning algorithms 3 Deep networks for gait based human identification ? Cross view  
gait based human identification with deep CNNs 4 How to build a practical gait based human identification  
system' '*Gait Correlation Analysis Based Human Identification*

August 28th, 2013 - Human gait identification aims to identify people by a sequence of walking images  
Comparing with fingerprint or iris based identification the most important advantage of gait identification  
is that it can be done at a distance In this paper silhouette correlation analysis based human identification  
approach is proposed By background'

'*Human identification based on gait eBook 2006 WorldCat*

---

---

*November 22nd, 2019 - Human Identification Based on Gait is designed for a professional audience composed of researchers and practitioners in industry This book is also suitable as a secondary text for graduate level students in computer science en schema'*

**'Human Identification Based on Extracted Gait Features**

December 18th, 2019 - Keywords human identification gait analysis Gaussian filter covariate factors and classification 1 INTRODUCTION Human identification based on biometrics is to distinguish individuals based on their physical and or behavioural characteristics such as face fingerprint gait iris and spoken voice'

**'Human Gait Recognition Based on Gait Energy Image**

**December 25th, 2019 - 2003 proposed human identification using silhouette image based on gait recognition**

---

---

Principal Component Analysis PCA is applied to silhouette images to reduce the dimensionality of the input feature space Anita Thengade and Rucha Dondal 2012 proposed the new system that recognize human gait model using genetic fuzzy finite state machine'

*'Gait flow image A silhouette based gait representation*

*September 9th, 2019 - There are two different approaches to gait recognition model based and model free In model based gait recognition information such as joint or hip position is gathered from the body This information is then used to construct a recognition model'*

*October 17th, 2019 - The authors describe the history of gait assessment and distinguish between gait analysis the area of interest for clinicians gait forensics the use of gait data in criminal investigation*

---

*and gait biometrics personal identification of individuals based on gait related data'* **Research Article Gait Correlation Analysis Based Human**

*November 30th, 2019 - Research Article Gait Correlation Analysis Based Human Identification JinyanChen School of Computer Software Tianjin University Tianjin China Correspondence should be addressed to Jinyan Chen chenjinyan tju edu cn'*

**'PDF Human Identification Based On Gait ResearchGate**

*December 24th, 2019 - Human gait is an attractive modality for recognizing people at a distance In this paper we adopt an appearance based approach to the problem of gait recognition The width of the outer contour of the binarized silhouette of a walking person is chosen as the basic image feature'*

---

**'Human Identification Based on Gait Analysis A survey**

*October 3rd, 2019 - Gait analysis investigates human body parts to find personal features for human identification Getting the features successively leads the way for successful human identification based on gait analysis Thus we will present some recent studies to capture those feature and identify humans'*

**Gait Correlation Analysis Based Human Identification**

**November 25th, 2016 - Human gait identification aims to identify people by a sequence of walking images Comparing with fingerprint or iris based identification the most important advantage of gait identification is that it can be done at a distance'**

**'AcousticID Gait based Human Identification Using Acoustic**

---

December 14th, 2019 - Yingxue Wang Yanan Chen Md Zakirul Alam Bhuiyan Yu Han Shenghui Zhao and Jianxin Li  
2018 Gait based Human identification using acoustic sensor and deep neural network Future Generation Computer  
Systems 86 2018 1228 1237'' ***Gait Based Person Identification Robust to Changes in***

*June 13th, 2016 - Overall appearance based approaches have been used with good results for human  
identification Iwama et al built a gait database which included 4007 people to show a statistically reliable  
performance evaluation of gait recognition and they showed that GEI achieved the highest performance among  
conventional methods We also showed the'*
