May 2nd, 2020 - Java is a free open source object oriented programming language plus a high powered development platform used to build tiered applications and fast running server applications Because Java is a portable ?write once run anywhere? language Java developers are able to write code that is patible everywhere"**Java Network Programming Harold Elliotte Rusty**

May 3rd, 2020 - It does not describe network programming techniques for non trivial applications in the context of the Java

language you might expect this given that the title doesn't mention the API at all. A pretty long introduction of 90 pages to networks, Java streams, and threads sort of makes the book self-contained with virtually no externally referenced material." ***Introduction To Java Programming Lecture No 1***
