and Antenna Arrays
with MATLAB and
July 2nd, 2018 - In
this webinar we will
introduce designing
antennas and
antenna arrays with
MATLAB and will
show how to
integrate them into
your system designs
The analysis and
integration of
antennas requires in
depth understanding
of the physical
properties of the
element and the
surrounding
structures For this
reason antennas are
generally designed
by'**

Music Algorithm for virtual array antenna

Ask Question up vote 0 down vote favorite

This code works for estimation of DOA Direction of Arrival using MUSIC algorithm In this code there are 4 real antennas in an array and distance between 2 antennas are $\lambda/2$ There are two signals estimated by DOA I am trying to interpolate virtual antennas in between real antennas so that DOA"
